Flutter with Firebase
Building AI Agents with Google ADK
Joining Data in SQL
Introduction to SQL

Sheikh Muhammad Sabih

Flutter & AI App Developer | Backend: Python, FastAPI, Django |
Firebase & API Integration | Building Scalable Mobile + AI Solutions
Karāchi, Sindh, Pakistan

Summary

I'm a mobile app developer who loves turning ideas into sleek, high-impact applications. Over the last four years, I've worked across Flutter, Firebase, and REST APIs to build mobile apps that people actually use, including one with more than one hundred thousand downloads.

My journey started with Flutter, but I didn't stop there. I've built backends using Python, FastAPI, Django, and Firebase. I've also explored the future by building apps powered by artificial intelligence, from smart search assistants to chatbots that help users make decisions through natural conversation.

Whether it's syncing real-time data across platforms, designing clean UI from Figma, or integrating AI features into mobile apps, I care about writing clean code that scales and makes the user's experience smoother.

I thrive in collaborative teams, but I'm also comfortable leading entire products from idea to launch. I believe great software doesn't just work, it feels right.

Technologies I work with:

Flutter, Dart, Firebase, Python, FastAPI, Django, REST APIs, Riverpod, Git, Google Maps SDK, Chatbots, LLMs, and custom AI modules

Experience

xLoop

3 years 5 months

Software Engineer II

July 2024 - Present (2 years)

Karāchi, Sindh, Pakistan

- ◉ Led real-time UI customization for the NEOM Saudi Arabia project using a low-code backend.
- ◉ Integrated advanced state management with Riverpod to optimize app performance.
- ◉ Enabled dynamic content updates from the backend without requiring app redeployments.
- ◉ Developed secure authentication and RESTful APIs.
- ◉ Contributed to AppPilot, a Django-based backend system designed for automated app deployment and monitoring.
- ◉ Co-developed BotXpro, a Generative AI chatbot platform, integrating LLM APIs for dynamic customer interaction.

Teaching Assistant

January 2024 - Present (2 years 6 months)

Karāchi, Sindh, Pakistan

Software Engineer

February 2023 - January 2024 (1 year)

Karāchi, Sindh, Pakistan

Expertise in:

- Amazon Web Services (AWS)
- Data Engineering
- Python (Programming Language)

Responsibilities:

- Data Pipeline Development: Design and create robust data and service pipelines to facilitate the seamless flow of data within the organization.
- Data Transformation and Cleaning: Transform and clean data to ensure its quality and reliability.
- Data Warehousing: Load processed data into advanced platforms like Snowflake, Azure Data Factory, and AWS RedShift.
- Real-Time Data Processing: Leverage technologies like Python and Kafka to enable real-time data processing.

- Data Orchestration with Apache Airflow: Utilize Apache Airflow to orchestrate complex data workflows efficiently.
- Containerization with Docker: Containerize data-related services and applications using Docker to ensure scalability and consistency.
- Database Management: Work with various databases to store and retrieve data, including database design, optimization, and maintenance.
- Data Lake Management: Manage Data Lakes, particularly blob storage, as a repository for diverse data types, ensuring accessibility and data governance.
- Data Visualization with Streamlit: Employ Streamlit for data visualization, providing stakeholders with intuitive interfaces to explore and interpret data-driven insights effectively.

Leopards Courier Services (Pvt.) Ltd.

Mobile Application Developer

June 2022 - February 2023 (9 months)

Karāchi, Sindh, Pakistan

Notable Contributions:

- Hum Leopard Internal App: Restructured the app to make it dynamic, allowing real-time customization of its appearance. Introduced a mechanism to prevent offline usage unless employees were online to update their attendance.
- Ops-E-Log Secure Management App: Maintained the app's robust security features and ensured its seamless functionality.
- Asset Audit Internal App: Contributed to the development and management of the app, facilitating efficient audits of logistics support centers.

Key Achievements:

- Debugged, designed, and made the Hum Leopard app dynamic, enabling users to customize its appearance in real time.
- Implemented a mechanism to prevent offline usage of the app, addressing the issue of delayed updates.
- Developed a version check system to track the app's current version, enhancing user experience and resolving crashes.
- Enhanced the attendance system by introducing graphical markers to pinpoint office locations, addressing attendance-related challenges.
- Overhauled the attendance history module, making it dynamic and efficient.

- Resolved issues within the payslip module, improving accuracy and reliability.
- Optimized the app update system, ensuring seamless deployment across the city, region, and country simultaneously.

Skills and Technologies:

- Android and iOS development
- Java, Kotlin, Swift, and Objective-C
- SQL, NoSQL, and REST APIs
- Firebase, AWS, and Azure
- Agile development methodologies
- Security best practices

Remerse

Mobile Application Developer

March 2022 - May 2022 (3 months)

Karāchi, Sindh, Pakistan

- Task related to Mobile Application Development using Flutter.
- Working with firebase and Rest API.
- Assign work to junior developers and train interns.

DA Tech

Flutter Developer

June 2021 - December 2021 (7 months)

Karāchi, Sindh, Pakistan

- Maintain all assigned tasks under mobile app development and design.
- Make applications like eCommerce and Social Media.
- Develop and maintain applications for our clients.

Remerse

Flutter Developer

January 2021 - March 2021 (3 months)

Karāchi, Sindh, Pakistan

Education

Sir Syed University of Engineering & Technology (SSUET)

Bachelor of Science - BS, Computer Science · (January 2018 - February 2022)
